

setMaxStepsBackwardProblem

setupB

setMaxNumStepsB

```
graph LR; A[setMaxStepsBackwardProblem] --> C[setMaxNumStepsB]; B[setupB] --> C;
```

The diagram illustrates a dependency or mapping where two separate functions, 'setMaxStepsBackwardProblem' and 'setupB', both point to a single target function, 'setMaxNumStepsB'. The arrows are dark blue and originate from the right side of the first two boxes, converging on the left side of the third box.
