

setAbsoluteToleranceQuadratures

setupB

applyTolerancesASA

```
graph LR; A[setAbsoluteToleranceQuadratures] --> C[applyTolerancesASA]; B[setupB] --> C;
```

The diagram illustrates a flow where two separate components, 'setAbsoluteToleranceQuadratures' and 'setupB', both point to a single target component, 'applyTolerancesASA'. The arrows indicate a directional relationship or dependency from the left-hand components to the right-hand component.
