

fsxdot

```
graph LR; A[fsxdot] --> B[amici::AmiVector::getNVector]
```

A diagram showing a mapping from a variable 'fsxdot' to a function 'amici::AmiVector::getNVector'. The variable 'fsxdot' is enclosed in a gray rectangular box on the left. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'amici::AmiVector::getNVector'. Both boxes have a black border.

amici::AmiVector::getNVector
